

ISI SYSTEMS, INC.

Training Seminars

Training is a primary part of any fall protection system since no fall protection equipment, regardless of how effective, can save an employee who is not trained in its use. In order to meet this requirement, ISI Systems, Inc. provides the knowledge and skills necessary to achieve a safer, more productive work environment.

Upon completion of the course, students will have a basic understanding of the following:

- Know the importance of fall protection on the job.
- Applicable fall protection regulations and ANSI Z359-2007 Fall Protection Code.
- Fall Protection hierarchy of controls – Elimination, Prevention, Arrest, Administrative
- ABC's of fall protection – Anchorage, Body Support, Connecting Means
- Anchorage points and basic anchorage point considerations
- Full Body Harnesses – Application/Donning Session
- Lanyards:
 - Shock Absorbing
 - Self-Retracting
 - 100% Tie off/Y-Lanyards
- Introduction to specialized fall protection equipment:
 - Lifelines – Horizontal/Vertical
 - Rigid Rail Systems
 - Ladder Climbing Systems
 - Work Positioning Systems
 - Controlled Descent Devices
 - 1st Man Up Devices

Our instructors are trained in both industrial and construction applications of fall protection, including confined space entry and rescue equipment. In addition to safety experience, our lead instructors are also trained in the disciplines of education and instructional design; Instructional team members are well-versed in the development and presentation of safety training programs, OSHA regulatory requirements and interpretations, methods for protecting workers from safety and health hazards, and the skills necessary to supervise and safely work in elevated environments.

All fall protection equipment required for instructional purposes will be provided. However, students having their own equipment are encouraged to bring that equipment to the course for use and demonstration. Upon successful completion of the course, students will be considered authorized persons for fall protection status by their employer.

ISI SYSTEMS, INC.

Inspections

ISI Systems, Inc. employees qualified inspectors of fall protection systems and equipment. Our inspectors have attained credentials from the most elite safety school in the United States. Our qualified team will analyze your equipment, identify any possible hazards and suggest necessary improvements that will keep your employees working safe at all times.

ANSI/ASSE Z359

ISI SYSTEMS, INC.

43029 Industrial Park Road – Cadiz, OH 43907 – (P) 740.942.0050

A competent person must inspect the fall protection equipment no less than annually. Documentation of annual inspections must be kept by the rescuer's organization. Documentation shall include the identity of the equipment, its inspection date, the name of the competent person conducting the inspection, and the results of that inspection.
